Custom Order Request

Aug 27, 5:17 AM

Specification

- Budget \$2,000
- 30 days delivery (Sep 26, 2025)

Criteria

Hi, I am lookin into having a navigation app designed. We breed whitetail deer and I want to create something that I can add addresses in and that users can map out a trip with those specific locations. I would like the app to also be able to play ads that I am able to upload. I want it to be able to be used on android and IOS. For the most part I just need the app set up. I'm sure I would need help with figuring out how but I would like to add the addresses in and be able to upload the ads that would play for a set timeframe.

Create an offer

Me

Hello there,

Thanks for reaching out and sharing your idea. Your idea for a navigation app sounds great. I can build it for both Android and iOS, where you can add addresses, let users map trips, and upload ads that play for a set time. I'll set up the base so it's simple for you to manage.

To get started, I just need to know:

- Should the app show the best route automatically, or let users pick the order of stops?
- Do you want ads as videos/audio during navigation, or banners inside the app?
- Will this app be just for your team or open for the public to download?

Once I have these answers, I can give you a clear plan and cost.

Best,
Mahmodul

Aug 27, 5:20 AM

sizematterswt

The ad's that I would want to add would be specific to the industry that we are in. I would like the app to show the best/fastest route. I would like the ad's to play on a banner within the navigation screen and I don't know if it's possible but if I am able to get an ad to play if the user is within a certain distance from the farm. For instance if someone was within 50 miles of me and that had that app up, it would play my ad more. The app would be open for the public to download.

Aug 27, 5:26 AM

Me

Thanks for the details, that helps a lot. Here's what I'll plan for you:

- Best/Fastest Route: The app will automatically calculate the quickest route between the addresses you add.
- Ad System: You'll be able to upload your own industry-specific ads. These will show as banners on the navigation screen.
- Location-Based Ads: Yes, we can make ads appear more often when a user is within a certain distance (like 50 miles) of your farm — this will help reach the right people at the right time.
- Public Access: The app will be available for anyone to download on Android and IOS.

This setup gives you a smart navigation tool plus a built-in way to promote your business.

Would you like me to prepare a rough timeline and cost estimate for the first version of the app?

Aug 27, 5:28 AM

sizematterswt

There is another thing I would like it to be able to do if possible. I am going to add farms and ranches. I am going to put them both on the map just in different colors. For instance maybe green for farms and then brown for ranches. If the user has been to a location they can click something saying done or check and that location will turn red so that they know in the future if they have been there.

Aug 27, 5:30 AM

sizematterswt

I would like to make it a paid app as well if I can. I am basing this price off on on-x maps but maybe 49.99 per year to download? You can probably tell me if I'm way off base with that number?

Aug 27, 6:33 AM

sizematterswt

And yes, please give me an estimate amd rough timeline for that

Aug 27, 5:33 AM

Me

Thanks for sharing the details with me.

I have reviewed the whole requirements and understand the full scope of work.

I propose to develop A navigation app for farms and ranches that helps users plan trips, track visited locations, and see ads relevant to the industry. Available for both Android and IOS.

Core features:

- Navigation & Mapping: Users can select addresses and the app will show the fastest route.
- Colored Locations: Farms and ranches are shown in different colors (like green for farms, brown for ranches).
- Visited Tracking: Users can mark a location as visited, which turns it red.
- Ads System: Industry-specific banner ads uploaded by the client, with the option for location-based targeting.
- Paid Access: Users can download the app via a yearly subscription (like \$49.99/year).
- Public Access: The app is available for anyone to download.

How it will work:

- Client adds farm and ranch addresses to the app.
- Users select locations to visit; the app calculates the fastest route.
- Users can mark places they've visited.

About sizematterswt

From United States

On Fiverr since Aug 2025

Activity PLUS

As a Seller Plus member, you get more insights on sizematterswt. [Learn more](#)

This buyer hasn't placed any orders yet. When they do, you'll see data here.

- Users can mark places they've visited.
- Ads appear on the navigation screen and can trigger more often if a user is near a location.
- Users pay for the app via a yearly subscription.

User Role:

- Admin / Client: Add addresses and locations, upload and schedule ads, and manage subscription settings.
- Users: View map and routes, track visited locations, and see ads during navigation.

Let me know if this captures your vision accurately, or if you'd like to tweak or add anything.

Looking forward to your feedback.

S

sizematterswt

Aug 27, 5:46 AM

Another thing I think I would like it to be able to do. I would like to add the contact information for the farm/ranch so that users would be able to click on the phone number and it takes them into being able to call that farm/ranch

S

sizematterswt

Aug 27, 5:46 AM

Other than that everything else sounds perfect

Me

Aug 27, 5:48 AM

So, do you have any allocated budget and timeline in mind for developing this?

As you know I am a top-rated seller. I will provide you with top-notch services from my end. Only 1% seller can reach this position based on their work.

I will complete the whole project in 3 milestones. So, you don't need to provide the whole amount at a time.

Right now you will pay only for the UI design phase.

Let me know your opinion.

S

sizematterswt

Aug 27, 5:51 AM

As far as the timeline goes, I would like it to be complete by mid-end of October if that is possible. I would like to be in that 2,000-2,500 range max but I understand that it is a lot of work too. I attempted to work on creating it and I realized that I'm not the person for that job

S

sizematterswt

Aug 27, 5:51 AM

you give me a price and we can go from there

S

sizematterswt

Aug 27, 5:52 AM

Also, do you do video chat once we get to the part where I add things so you can teach me what I'm doing and how to go about working the back end of the app?

Me

Aug 27, 5:54 AM

Yes, my team will guide you for every purpose. You will get 1/2 updates per week.

My team will arrange a meeting with you when needed. They will guide you on getting APIs.

Provide you all kinds of instruction. Also, you will get 90 days ongoing support after the delivery.

S

sizematterswt

Aug 27, 5:55 AM

Wonderful

Me

Aug 27, 5:57 AM

As we discussed,

I will develop A navigation app for farms and ranches that helps users plan trips, track visited locations, and see ads relevant to the industry. Available for both Android and iOS.

Core features:

- Fastest Route Navigation: Automatically calculates the quickest route between locations.
- Colored Locations: Farms and ranches are shown in different colors.
- Visited Tracking: Mark locations as visited (turns red).
- Ads System: Upload industry-specific banner ads with location-based targeting.
- Clickable Contact Info: Users can call farms/ranches directly.
- Paid Access: Yearly subscription for app download.
- Public Access: Available for everyone on Android and iOS.

My deliverable:

- Figma Design Files (UI/UX)
- Complete Source Code (Frontend & Backend)
- Fully Developed Frontend (Flutter)
- Robust Backend System (Laravel/Node.js)
- Provided ongoing SEO service (free).
- 90 Days of Ongoing Support post-delivery
- Free Maintenance for minor bug fixes and modifications

Tech Stacks:

- UI/UX: Figma
- Frontend: Flutter, Dart
- Database: MySQL
- REST API
- Backend Framework: PHP, Laravel

Project Phases:

Phase 1: UI/UX Design

- Wireframes and sleek interface – \$1000 USD, 20 days.

Phase 2: Backend Development

- Secure database and APIs – \$1500 USD, 20 days.

Phase 3: Frontend Development

- Interactive UI – \$1500 USD, 20 days.

Phase 4: Launch & Support

- Deployment and ongoing support – \$500 USD The timeline depends on the Play Store and App Store.

Total: \$4500 USD, 60 days(approximately)

Let me know your thoughts! Looking forward to your response.

S sizematterswt I will discuss with my husband and get back with you tomorrow	Aug 27, 6:51 AM
Me Thank you for your message. I completely understand you may need some days to decide, but let me assure you of one thing. If you decide to move forward with me, I will be your long-term partner and give you every kind of support you need, not only for development but also for the growth of your business. I will never let you down. The reason many low-price sellers are not the right fit for a project like this is that they usually deliver something that looks good at first, but lacks scalability, security, and proper structure. In the end, you'll spend more time and mo-ney fixing issues rather than focusing on growing your platform. As a Top Rated Seller on Fiverr, I bring proven trust, professionalism, and a dedicated team for each tech stack, UI/UX, frontend, backend, and QA so that every part of your platform is built with precision and future growth in mind. I'd love to get the project rolling now and help you be ahead of competitors in this space. Looking forward to your thoughts. Best regards.	Aug 27, 6:53 AM
S sizematterswt Ok, I'm thinking something else to add. I would like to add a couple of seperate pages if possible. I think I want to have 3 seperate tabs on the app. I would like to have a tabs at the bottom. 1 for farms, 1 for ranches, and 1 for events. So basically there will be 3 sets of maps. And the events tab I would like to be able to add a list of the events and then when the user click on the event it will take them to the location on the map	Aug 27, 7:44 AM
Me Okay, that's also doable. No worries! I can implement that at this price. As it is a simple task, no need to add any extra cost for that. Let me know if you have any other questions or concerns, or if I should send you the offer for the first phase to get started. As the first phase is the design phase, you can guide me to do the design, and I will do it as per your expectations. In this process, we can make something that truly looks amazing. I will do editing continuously until you are satisfied with the design. In my country, it is morning time, which is a peak time to start working with a fresh mind. If you are ready to begin now, then we can start the design right after your confirmation. Let me know your thoughts on this Best regards,	Aug 27, 8:17 AM
Me Hello there, I just wanted to kindly follow up with you. I know you mentioned discussing things with your husband, and I completely understand that these decisions take a little time. I'm really excited about your project, the navigation app with farms, ranches, and events has huge potential. Since we already have a clear plan with all features in place, we can begin the design phase anytime you're ready. That way, you'll be able to see your vision take shape visually before development starts. No pressure at all. I just wanted to check in and see if you've had any more thoughts or if there are any new ideas you'd like me to include. Looking forward to your reply.	Aug 28, 12:59 AM
S sizematterswt Hi there. I do have few questions. Are we able to do a zoom call at some point to discuss a few things? Mostly in regards to the ads that I would want to have running	Aug 28, 7:09 PM
Me Thank you so much for the message, I will be available in about 3-4 hours, I hope that is alright.	Aug 28, 7:23 PM
S sizematterswt That will work.	Aug 28, 8:01 PM
Me Thank you so much.	Aug 28, 9:02 PM
Me Hello there, Are you available for the meeting now?	Aug 29, 12:50 AM
S sizematterswt I'm sorry I'm just now seeing this	Aug 29, 7:43 AM
Me Okay, no worries! We can have the meeting now. May I send you the meeting link?	Aug 29, 7:50 AM
Me Hello there, This is the perfect time to move forward. I can already see the future of your platform. It's more than just a navigation app; it's going to become a go-to hub for farms, ranches, and events. With a yearly subscription model, even just 1,000 subscribers means nearly \$50,000 in recurring revenue every year, and that's not including the additional income from your industry-specific ads. Sponsors and partners will be eager to feature themselves here because of the niche audience you're targeting. I can also see your platform going live successfully. Users will get real value, and you'll have a strong, scalable business asset that grows year after year. This is the type of project that, once launched, builds a community and opens the door to endless opportunities. Let's lock this in today. Join the meeting now so we can finalize the plan, set milestones, and get the design phase started. The sooner we start, the sooner your app can hit the market and begin generating revenue for you.	Aug 30, 12:40 AM

I'll be ready and waiting for you in the meeting!

Best regards,
Mahmodul

Me

Hello there,

I am just checking whether you have any updates for me or not.

I am excited to work with you.

If you have any further concerns about my quotation and timeline, feel free to share.

Looking forward to your response.

Regards.

Sep 23, 4:13 AM

Me

Hello Matt,

Long time no response from your end about your project.

I am still excited to move forward with you and waiting for getting response from you.

Let me know your decision.

Look forward to your response.

Regards.

Oct 21, 8:12 AM

S

sizematterswt

Hello. I was wanting to reach back out. I believe I am ready to get started on this project. I was wanting to ask though, in talking with someone else about the running ad part. Is it possible to have the ads play when the map is running? I just wondered because he told me it wasn't possible to do and that the ads could only play when the app is open not when the map is up. Thank you and I'm so excited to get this going!

Oct 28, 12:19 AM

Me

That's great news. I'm really happy to hear you're ready to get started.

Regarding your question, yes, it's definitely possible to display ads while the map is running. We can overlay banner or small pop-up-style ads on top of the map without interrupting navigation. I'll ensure it's implemented smoothly, so the user experience remains clean and professional.

Let's proceed with the design phase now. Shall I send you the offer for Phase 1 (UI/UX Design) to begin?

Oct 28, 1:30 AM
